

Ruby on Rails (Backend & Full-Stack)

Personal Statement

Ruby on Rails Full-Stack Developer with 16 years of experience building custom, scalable applications, scrapers, APIs, and large-scale data processing systems.

Language Skills

- Latvian (Native)
- English (Near native - C1)
- Russian (Proficient in spoken)

Personal Info

- **Location:** Latvia
- **E-mail:** EdCordata@gmail.com
- **CV (online):** <https://github.com/EdCordata/EdCordata/blob/main/doki/CV.md>
- **CV (PDF):** <https://github.com/EdCordata/EdCordata/blob/main/doki/CV.pdf>
- **GitHub:** <https://github.com/EdCordata>
- **GitLab:** <https://gitlab.com/EdCordata-REPOS>
- **LinkedIn:** <https://LinkedIn.com/in/EdCordataLV>
- **Discord:** @EdCordata

Professional Experience Highlights

- **Web Applications:** Built large-scale web apps handling high daily traffic, real-time and snapshot stats, extensive background processing, live Web-Socket events, complex queries, and large custom admin panels.
- **Scraping & Data Processing:** Developed scrapers for documents (DOC, XLS, PDF, CSV, XML, JSON), web pages (HTML/JS), RSS feeds, e-mails, and APIs.
- **APIs:** Designed multi-version APIs supporting multiple formats (JSON, XML, HTML, PDF, YAML) with robust integration and automatic documentation.
- **Automation & Integration:** Automated info distribution via social networks, webforms, emails, APIs, and ads.
- **Cross-Platform Apps:** Built mobile (Windows, Android, iOS) and desktop apps.
- **Browser Extensions:** Created cross-browser extensions for Chromium-based browsers, Firefox, and Safari.
- **Native Windows Tools:** Developed system services, GUI apps, and custom console tools.

Technical Approach:

- Clean, maintainable, and readable code (not just stylistic compliance)
- High-performance systems handling real-world scale
- Minimal, well-chosen dependencies
- Learning new tools and technologies as needed and for fun

Core Technologies

- **Backend**
 - Ruby (Rails, Grape, Sinatra)
 - Node.js (ExpressJS)
- **Frontend**
 - JavaScript, VanillaJS, jQuery, BackboneJS, VueJS, React, Angular, Turbolinks, Hotwire
 - HTML5
 - CSS3 (SCSS, SASS)
 - ERB, HAML, EJS
- **Databases & Search**
 - SQL (MySQL, PostgreSQL, SQLite)
 - NoSQL (MongoDB, Elasticsearch)
 - In-Memory: Redis, Custom JSON storage systems
- **Infrastructure & DevOps**
 - Docker, Docker Compose, Vagrant, WSL1 / WSL2
 - Nginx, Puma
 - AWS, VPS environments
 - CI/CD: GitLab CI, Capistrano
- **Testing**
 - RSpec, Minitest
 - Capybara, Mocha
 - Selenium, Percy
- **Tooling**
 - FFmpeg, ImageMagick
 - Webpack, Gulp
- **APIs & Integrations**
 - Stripe, PayPal
 - Google APIs (Maps, Gmail, Calendar, Vision)
 - Facebook, X (Twitter)
 - YouTube, Vimeo
 - AWS services
- **Software & Workflow Tools**
 - Jira, Slack, Trello, Asana, ClickUp, Basecamp
 - Photoshop, Illustrator, Inkscape, Pixelorama
- **Additional Technical Experience**
 - C#, C++, VB.NET
 - Java (Android, plugins)
 - Dart (Flutter)
 - Python, Bash, VBS
- **Game Development (secondary)**
 - Unreal Engine (C++ / Blueprints)
 - Unity (C#)
 - Godot / Redot (GDScript)
- **3D Software**
 - FreeCAD
 - Sketchup
- **Hardware / Experimental Systems (secondary)**
 - CNC / 3D printing / laser cutting systems
 - Automation and embedded experiments

Experience History

Freelancing (2020 – 2026) | Ruby on Rails Developer | Remote

- Maintained and extended a large monolithic Ruby on Rails application serving 20+ clients with thousands of users, handling 1M+ daily requests.
- Built large-scale data ingestion pipelines and scrapers consuming web pages, APIs, JSON, XML, and JavaScript-rendered content for client data workflows.
- Developed and optimized machine learning models for doodle classification, matching children's drawings to corresponding LEGO builds.
- Implemented admin and client-facing interfaces for managing large user bases, including per-domain feature toggles and configuration systems.
- Refactored legacy codebases into modular, maintainable components aligned with Rails best practices.
- Mentored junior developers through code reviews, technical guidance, and knowledge sharing.
- Authored and maintained technical documentation covering system architecture, internal tools, and development workflows.

Data Wow Co., Ltd. (2019 – 2020) | Ruby on Rails Developer | Remote / Onsite (Thailand)

- Supported and maintained back-end infrastructure for 17+ mobile applications, consolidating shared logic to reduce duplication across the platform.
- Hardened mobile API security across all applications.

Eforma (2017 – 2019) | Ruby on Rails & PHP Developer | Remote / Onsite (Latvia)

- Delivered a wide range of projects including websites, web apps, games, learning tools, and ad platforms across Rails and PHP (WordPress, Joomla).
- Built Rails applications for large-scale data parsing and document processing.
- Managed and migrated VPS infrastructure, consolidating multiple servers into unified environments (first native, later Docker-based).

Amitum (2016 – 2017) | Ruby on Rails Developer | Onsite (Latvia)

- Built a multi-source news aggregation platform pulling from 10+ content sources.
- Designed a real-estate platform with canvas-based interactive property selection.
- Created a telemedicine platform with appointment booking and live chat.

Mosties (2013 – 2015) | Ruby on Rails Developer | Onsite (Latvia)

- Developed a fashion-focused social network with large-scale price tracking, admin-driven scraping, and a companion cross-browser extension.

BetterBooks Publishing (2012 – 2013) | Ruby on Rails Developer | Onsite (Latvia & Germany)

- Built an e-book scraper and a mobile reading app supporting e-book and PDF formats.

Creative Mobile (2011 – 2012) | Software Developer | Onsite (Latvia)

- Developed a golf statistics tracking application.
- Built a corporate social network for team collaboration and idea sharing.

Code Examples:

- [My Personal Projects](#) (highlights list on my GitHub)
- [My Open-Source contributions](#)
- [Code snippets from projects](#)

Work Requirements

- Fully Remote
- Contractor Engagement (preferred)
- My own Hardware and OS (custom made linux distro)

Interview Process:

- No AI interviews
- No timed tests/challenge websites
- No live-coding/whiteboard interviews

Areas of Interest / Learning

- Kubernetes & CI/CD
- Building custom LLM models

Building things is my passion, and I have a wide range of personal projects, including:

- Homemade Smartphone & Laptop
- Homemade CO2 laser cutter
- Price comparing website for all stores in my country
- And more...
